General Notes

This upgrade includes fixes that have been tested by SCLS staff and staff at some libraries. To the best of everyone’s assessment, the fixes are working well and any bugs identified during testing have been fixed. However, as we learned with past upgrades and patches, we may experience unexpected results following the upgrade. We may also discover new problems. We will use the [Known Problems page](#) to document any post upgrade problems.

Circulation

Not For Loan statuses blocking Check In. (SCLS Support ticket #22165) Not for loan statuses were blocking item check-ins for items owned by other libraries and not allowing override; fixed.

Checkout search boxes not accepting truncated patron barcodes. (SCLS Support ticket #20257) A fix has been applied; when staff enter a truncated patron barcode (minus their library’s prefix) in a Check Out search box, the system will recognize the number and supply a record to select (autofill) or, after hitting Enter, will direct staff to the correct record. Libraries with several zeros between their prefix and the identifying characters may have to enter the leading zeros as well.
