General Notes

This upgrade includes fixes that have been tested by SCLS staff and staff at some libraries. To the best of everyone’s assessment, the fixes are working well and any bugs identified during testing have been fixed. However, as we learned with past upgrades and patches, we may experience unexpected results following the upgrade. We may also discover new problems. We will use the [Known Problems page](#) to document any post upgrade problems. **After the upgrade, please clear your browser’s cache before using Bibliovation.**

Circulation

Problem with Birthdate field when adding new patron record. When entering a new patron record, if the birthdate was entered in any format other than mm/dd/yyyy, then Bibliovation would wipe the form when staff clicked the Save button. (SCLS Support Ticket 24666, 25486)

~~**Adding Patron records — missing "Duplicate record" pop-up.** When a staff person accidentally entered a New patron record with a patron barcode and PIN already in use, the system was wiping the data in the form instead of supplying the “Duplicate record Y/N?” pop-up. The pop-up has been restored. (SCLS Support Ticket 26056). **NOT FIXED in 6.02.13.**~~

Item on hold shelf displaying on Holds Queue report. Items on the hold shelf for one patron were also showing on the holds queue as selected to fill a hold for that patron or another patron. This has been fixed. (SCLS Support Ticket 25282)

Reports

Bibliovation reports. If a report failed, the error screen displayed code instead of a readable message. This has been fixed. (No SCLS Support Ticket)
