General Notes

This upgrade includes enhancements and fixes that have been tested by SCLS staff and staff at some libraries. To the best of everyone’s assessment, the fixes are working well and any bugs identified during testing have been fixed. However, as we learned with past upgrades and patches, we may experience unexpected results following the upgrade. We may also discover new problems. We will use the [Known Problems page](#) to document any post upgrade problems. **After the upgrade, please clear your browser’s cache before using Bibliovation.**

Circulation

Defect Reported workflow not working: When staff would ignore a hold to assign the Defect Reported status, the second check-in (to send item to owning library) was trapping the item for an active holds. This problem has been fixed. (SCLS Support ticket #2047)

Staff Client

Add to Lists button doesn't work: The “Add to Lists” button on the staff interface Details screen, Edit Items, and Item Statuses pages was not working – when you clicked the button nothing happened. This problem has been fixed. (SCLS Support Ticket Number 907)
