

**WISCONSIN
LIBRARIES'
DELIVERY
NETWORK
LIST**

www.sclsdelivery.info

Navigating the List

The Wisconsin Libraries' Delivery Network List alphabetically lists all libraries in Wisconsin which currently maintain a delivery connection through the Wisconsin Libraries' Delivery Network. The list includes public libraries, school districts, academic and special libraries, Wisconsin government agencies, and correctional institutions.

Modifications to the list are made as they are received. Corrections, additions, deletions, or other changes can be sent to [Tim Drexler](#). For the latest changes, please visit the [SCLS Delivery Service blog](#), where you can browse the archived "[Delivery Network Change](#)" posts. RSS feeds and e-mail alerts from the blog are also available.

Libraries with multiple branches are listed in gray-shaded tables, in addition to separate alphabetical listings for each branch. When applicable, central branch libraries are listed as such, with their geographical location also provided.

Libraries with an alternate name are listed with a "see _____" link referring back to the name of the library by location or city name.

Items for libraries which are not included in the Delivery Network List must be mailed. Such items sent through the delivery network will be returned to the sending library for further processing.

Routing Label Summary

All items sent via the Wisconsin Libraries' Delivery Network must be labeled with the following routing information legibly and prominently displayed:

- Route To: (system delivery hub) - 2nd table column
- For: (delivery network member) - 1st table column
- Date: (date put into delivery)
- From: (library putting item into delivery)
- Notes

A printable version of the blank SCLS Delivery ILL ("pink") label is included on the last page of this file. A version of the same label file with form fields that can be filled out electronically is also available on the [SCLS Delivery website](#).

www.sclsdelivery.info

Routing Labels For Schools

Many Wisconsin school districts (though not all) maintain delivery network connections through their local public library system. These schools may receive direct delivery from the system delivery service, or they may have a delivery connection through their local public library. In both cases, the delivery routing label should include the following information:

- Route To: (system delivery hub) - 2nd table column
- For: (school or school district name) - 1st table column
- Date: (date put into delivery)
- From: (library putting item into delivery)

Where applicable, the following additional pieces of routing information should be included in the "Notes" fields of the routing label:

- "via _____ PL" for schools that have a delivery connection through a local public library. The "via _____ PL" information is listed in the Delivery Schedule column of the network listing table for schools with this type of connection.
- School Name (if available)
- Staff member or room number (if available or needed)

Other states

[MINITEX](#) provides [delivery service](#) to select libraries in Minnesota, North Dakota, and South Dakota, which are connected to the Wisconsin Libraries' Delivery Service Network. Refer to the [list of libraries on the MINITEX courier network](#) ( PDF) to determine if you can send or return an item to MINITEX via SCLS Delivery. **If you have an item to send to a library but can not find the library in the MINITEX Delivery Network, then you must find another means of shipment, i.e. US Postal Service or commercial parcel/courier services.**

More Information

The [Delivery Services Advisory Committee](#) has developed a [Delivery Service Best Practices for Library Staff](#) ( PDF) covering routing, labelling, and packaging.

Statewide delivery network members are encouraged to review the [Wisconsin Libraries Delivery Network Shipping and Use Guidelines](#).

South Central Library System member libraries can refer to the instructions on the information found on the [SCLS Member Library Shipping and Use Guidelines](#) page.
